

Organization: [Environmental Synergies in Development \(ENSYDE\)](#)

Position: [Environmental Trainer & Project Coordination](#)

Location: Bangalore, INDIA

About ENSYDE

We are an NGO with an aim to reduce the environmental footprint of organizations, establishments, and institutions in India. We design and implement programmatic solutions that improve resource use efficiency, specifically, energy, water, and waste. Deeply integrated into our projects and programs, are environmental awareness and behavioral change through customized experiential learning for the stakeholders involved.

Environmental Synergies in Development (ENSYDE) was established in 2003 as a consultancy organization. It has been registered as a public charitable trust (2016) to continue its service towards the conservation and betterment of our environment. We strongly believe in breaking barriers to environmental sustainability by bringing resource management practices to every entity. We believe that in order to be impactful, shifting the current development paradigm towards environmental sustainability through thoughtfulness, experiential, and behavioral awareness is key.

About the program

Children have the ability to change the way they respond and treat our natural environment, through appropriate awareness and action. While they are keen observers of the changes in our environment and the direct impacts on their future, they are not always aware how they may contribute to make a difference. Keeping this principle in mind, the Planeteers Initiative was launched by ENSYDE over 5 years back. With over 5000 students sensitized and 200+ sustainability projects implemented; the initiative has the potential to have far reaching impacts.

The Planeteers Initiative which imparts environmental sensitization and action through experiential learning. The students are engaged in understanding the issues surrounding climate change, waste and water, through projects that the students are required to implement. These projects are implemented either in their homes, communities and/or institutions.

Role & Responsibilities of Environmental Trainer/Coordinator:

1. Schedule events and programmes associated with the project.
