

VANALOK is a startup eco-enterprise engaged in promoting nature education with a focus on forests, wildlife, and sustainability among the general public. As an enterprise, we develop innovative community-based nature education projects/programs which include material development, establishing interpretation exhibits (indoor and outdoor), creating discovery centers, conducting nature camps, establishing natural and cultural trails, organizing awareness programs for various stakeholders, and carrying out research and documentation. VANALOK team comprises specialists with nearly 20 years of experience in executing nature-related projects and works closely with various departments in Karnataka and other stakeholders engaged in the protection of nature and natural resources.

We are looking for a **Junior Researcher** and an **Intern** as a part of the Internships offered through our ongoing projects/programs.

May we request your kind help in this regard to suggest a suitable candidate and oblige.
